Sebastian Herrera

Software Engineer

sebashm621@gmail.com | +57 3146113602 | https://github.com/JoansebHM

Professional Profile

Software Engineer focused on designing, developing, and continuously optimizing scalable software solutions that solve real business needs. Experienced in full-stack development, from creating intuitive and engaging user experiences to designing backend solutions that accurately model and support business processes. Strong advocate for continuous improvement, agile methodologies, continuous delivery of value, and the use of metrics to measure progress, quality, and impact. Experienced in modern software architectures, performance optimization, automated testing, and maintainable codebases. Driven by engineering practices that simplify complexity, improve processes, and make technology more useful and accessible to the people who rely on it.

Work history

Sep 2024 - Present
Software Engineer - SIRMED

- Led the refactoring of a legacy codebase into a modular architecture based on Atomic Design and SOLID principles.
- Designed and implemented reusable TypeScript components, custom hooks, and shared application patterns.
- Implemented application performance optimizations using lazy loading, code splitting, caching strategies, and state management techniques.
- Implemented TanStack Query for server-state management, data fetching, and client-side caching.
- Configured and integrated RabbitMQ for asynchronous communication and event-driven interactions between microservices.
- Developed full-stack features integrating frontend interfaces with backend services aligned with business processes and domain requirements.
- Developed interactive dashboards, advanced search and filtering systems, and large-scale geospatial data management features for a platform used by more than 500 daily users across educational institutions, public and private organizations, government entities, and businesses in Medellín.
- Implemented role-based access control and global state management using Zustand.
- Designed and implemented automated tests with Vitest, achieving 95% code coverage.

Education

Aug 2026 – Present
Specialization in Software Development,
EAFIT University, Medellín, Colombia
Currently pursuing

Jan 2021 – Nov 2025
B.Sc. in Software Engineering, Pascual Bravo University, Medellín, Colombia
GPA: 4.5 / 5.0

Languages

Spanish (Native) | English (Advanced)
